SUMMARY

Computer Science undergraduate experienced in building full-stack applications using Java, JavaScript, React, Node.js, Express, MongoDB, and PostgreSQL. Skilled in designing, testing, and debugging REST APIs using Postman, with a solid foundation in modern web technologies, data structures and algorithms, GenAI-assisted development and software development practices.

EDUCATION

Bangalore Institute of Technology, Bangalore, India

Expected May 2028

Bachelor of Engineering in Computer Science (CGPA: 9.25)

Private High School, Kolhapur, Maharashtra, India

May 2024

Higher Secondary Education (Percentage: 85%)

TECHNICAL SKILLS

Languages: C, C++, Java, JavaScript, HTML, CSS

Database: SQL

Frameworks & Tools: Node.js, Express, MongoDB, React, npm, Git, GitHub, VS Code, Postman, Windows

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPs), Operating Systems, DBMS

GenAI Tools: Mistral AI, Gemini

PROJECTS

Movie Booking Application

- Developed a full-stack application featuring movie listings, seat selection, and a complete booking system
- Built REST APIs for managing users, shows, and bookings
- Implemented real-time seat availability logic
- Tested all REST API endpoints using Postman to validate functionality and debug issues

BeHonest — AI-Based Lost & Found System

- Developed a full-stack application for reporting, matching, and recovering lost items on campus
- Implemented AI-driven ownership verification, image moderation, and a fair reward recommendation system
- Built secure payment escrow, anonymous user interaction, and fraud detection mechanisms
- Designed REST APIs for user, item, claim, and transaction management

Typed Document Converter (Handwritten → Digital)

- Built a system to convert handwritten PDFs into editable, typed, and searchable documents
- Enabled export in multiple formats, including PDF, DOCX, and TXT
- Focused on improving accessibility and overall usability

URL Shortener Application

- Created a backend service to generate short URLs from long links
- Implemented redirection logic and unique ID generation
- Designed a scalable REST API structure to support multiple users
- Tested endpoints using Postman and debugged redirection issues to ensure reliability

ACHIEVEMENTS & LEADERSHIP

- **Core Member, Oscore Technical Club:** Organized and conducted technical workshops and ideathons to promote hands-on learning among students
- **SAP Hackathon Participant:** Advanced to the regional round of the SAP Hackathon after clearing the college-level screening with a project-based solution, demonstrating strong problem-solving, teamwork, and idea validation skills in a competitive environment

- **Grand Finalist, CodeCrafter 2026:** Qualified among the top 175 teams out of 700+ teams nationwide in an ICPC-style national coding competition focused on advanced algorithmic problem-solving and teamwork
